RUS-COLORPLUS

RUS-COLORPLUS
advanced remote control panel for BLT Video Server

HIGH EFFICIENCY FOR LIVE & SPORT

RUS-ColorPlus (Remote Unit System) is specifically optimized for the professional end-user to provide fast and efficient user interface required for live and sport applications: clip mark and management, sequences, playlists, highlights, ISO multicamera, networking to share clip materials.
More over optional dedicated BLT APP extend the operation capabilities for applications such as Media Asset Management and Live Edit & Delay.

BOOSTING VIDEO SERVERS

It's designed to unleash the advanced capabilities of BLT video servers, while keeping its user friendly operating characteristics.

CONTROL BY A SINGLE OPERATOR

With the largest color LCD display of the category and up to 2 external display for extended operation, RUS ColorPLUS allows even to a single operator to simultaneously control networked BLT Video Servers for instant highlight creation and live editing.
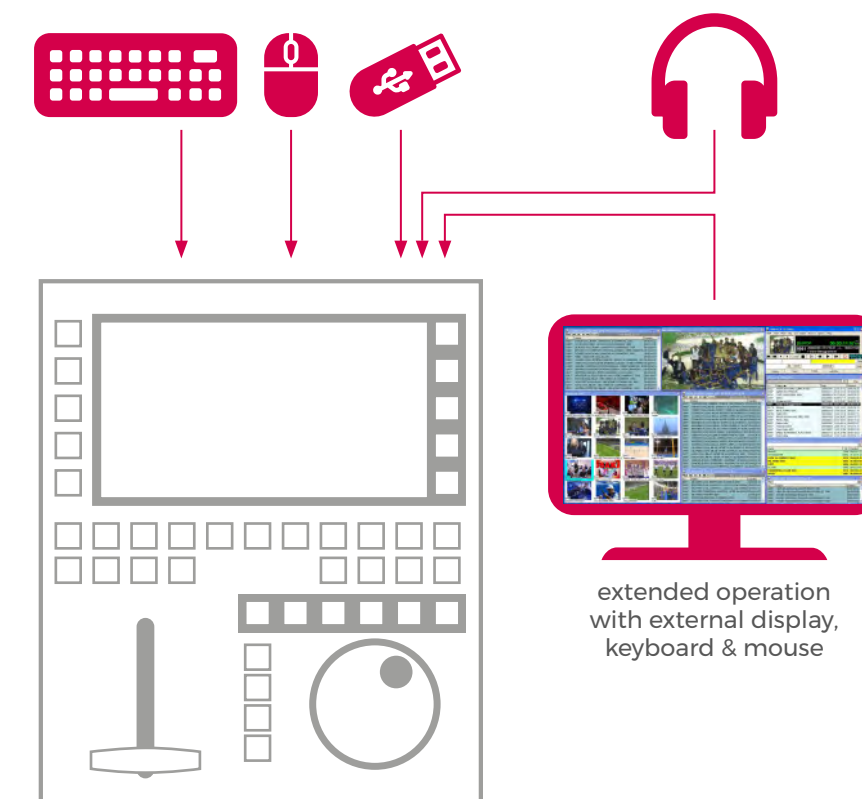

COMPACT

RUS-ColorPlus, thanks to its compact size, fits into limited space available in OB Van as well as in TV Studios.

Features and technical specifications

✔ Replay, slow motion and super slow motion up to x8

✔ Ultra motion/hypermotion support

✔ Jog/Shuttle, "T-Bar", VTR look-and-feel control style

✔ Cue point, clip and sequence management, single channel or multicamera, system networking

✔ Up to 100 PlayList with 1000 Clip each

✔ Program/preview split operation mode

✔ 7 inches large color LCD display

✔ Audio Monitoring: level meters and speaker/headset output

✔ 4 configurable GPI inputs and outputs

✔ LAN connection for Server remote control over IP (Dual Gigabit)

✔ Improved speed of operation, fast access to content

✔ Collaborative operation between more Panels and Servers and remote production workflow (**BLT patented**)

✔ USB ports for Mouse/KBD and Removable Media/Storage for file exchange/ingest with BLT Video Server

✔ Stand alone operation or extended with Desktop Monitors

✔ Dedicated BLT APPs, spanning from extended operation through one or two external Desktop Monitors, to optional add-on Media Asset Managemente (BLT Teca), Advanced HighLights packages (BLT TotalView), Live Edit & Delay (LED).

RUS-COLORPLUS, high flexibility, rich connectivity

extended operation with external display, keyboard & mouse

The RUS-ColorPlus control panel is a complete work station that offers to operators a new workflow for TV production, with the aim of productivity increase, cost optimization and efficient management of hardware and human resources.

Beyond the traditional control panel operations, RUS-ColorPLUS implements the unique feature on the market of remote production (**BLT patented**) through IP connectivity over private VPN or public Internet with extremely low latency.
Together with BLT Video Servers SMS-AV series, the RUS-ColorPLUS control panel allows real-time monitoring of the incoming feeds, preview and playout with proxy quality and low latency control over reduced bandwidth IP network, while full quality material is on-air by the remotely controlled BLT Server.

VIDEO SERVERS

BLT video servers are ideal for live and sport events productions, ensuring television directors flexible and efficient tools to capture unforgettable moments.

TRANSCODING

BLT transcode systems rewrap on-the-fly BLT SMS series video server material and live recording, towards third-party production systems for the interoperabiliy and file exchange.

ACQUISITION

BLT acquisition servers are ideal for live and sport events productions, ensuring television directors flexible and efficient tools to capture unforgettable moments.

STORAGE

Togheter with Central Storage, BLT capture system changes the way datas are exported for remote postproduction.

REMOTE CONTROL PANEL

BLT remote panels with integrating Jog wheel, T-bar lever and display offer the complete solution for any production need.
The latest generation of BLT panel with embedded workstation further expands the user experience to remote production.

SOFTWARE

BLT softwares APP create systems for management of all operations and complex workflows during mission critical events, such as live, sport, news and entertainment productions.
